Survey Insights: What 1,000 Singles Desire in Cultural Experiences

Our recent survey of 1000 singles revealed that a significant 26% enjoy exploring historical sites and 19% relish visiting museums, highlighting a shared passion for delving into the past. These interests are even more pronounced when considering activities with a partner, where 34% of singles favour exploring historical sites together, and 19% enjoy museum visits.

Despite these interests, our findings show that participation in cultural activities varies, with 38% partaking occasionally and 33% rarely. Yet, when it comes to relationships, 65% of singles feel it's at least somewhat important for their partner to share these cultural interests, illustrating the potential for meaningful connections through shared experiences.
